# THE STINK EYE

THE STUDENT NEWSPAPER: SATIRE EDITION

## College President Arrested for Speeding

Leather, tattoos and hard rock seem to be what makes Kent Hanson tick.

By Dem Northernlights, Staff Writer

ARCC president Kent Hanson was just arrested for speeding at the Sturgis motorcycle rally that was held in North Dakota.

Hanson, a Harley Davidson enthusiast and college president on the side, was just too excited to be with his motorcycle buddies.

"I was so excited to get to the rally, I completely lost track of how fast I was going," said Hanson.

Hanson then started talking about his tattoos. He has several on his back.

"My favorite biker tattoo is the one that is shaped like a heart and says, 'Mom.'"

"If my mom were here today she would be pretty upset," said

Hanson, who temporarily forgot that he has been a college president for three years.

Hanson also said he has been rallying college students to pledge him for his activities at Sturgis.

"I had students commit \$1 to me for every 10 miles I ride in the rally. I am hoping to spend the money on some new leather to wear when I go riding on my Harley," said Hanson.

According to Hanson if all students got Harleys, parking would be much easier at ARCC. He plans to have that on his agenda in his next college meeting.

Hanson has been repeatedly cited at midnight in the ARCC parking lot, blasting Metallica.

## Top Five Rejected Student Newspaper Names

By Dr. Denominomination, Staff Writer  
Here are the top five rejected student newspaper names. These great names were suggested to help "rebrand" our newspaper.

1. Events R Us
2. The Stink PR
3. No Sports for You
4. The Stink Poop
5. Need More Writers

## Student on the Street

By Savage Clemens, Staff Writer

**How do you feel about the mile wide meteor approaching Earth?**

- "Does this mean school is cancelled?"
- "Can collection agencies collect student loans in Hell?"
- "You might say that I am rather burned out about it. Get it? Ha ha."
- "I'm not worried, we still have Bruce Willis."
- "Thanks God, I won't be able to bomb my physics exam."

# Some Alternative Uses of Those Expensive Textbooks\*

By Savage Clemens, Staff Writer

**1. Dumbbells:** Science textbooks provide great arm workouts when picked up at least once a semester. With some textbooks weighing close to ten pounds, they can add great resistance to a workout.

**2. Looking Taller:** Vertically challenged people find sitting on textbooks can help them see over tall people sitting in front of them in lecture. Taping a textbook to the pedals of car can also help students to reach the gas and brake pedal in big cars. Cars can also be disposed of into lakes by leaving some heavy books on the accelerator just like in the movies.

**3. TV Stands:** When a couple textbooks are not being read they can make the best \$1000 TV stand that college students can afford.

**4. Pillows:** When late hours hit and students have put off a final essay, anthologies of classical stories have been found to feel really soft. As an added bonus, the ink from your textbook can leave a really artsy temporary tattoo on the cheek.

**5. Impressing Others:** Having an organic chemistry book can make an individual appear intelligent regardless of whether that person passed organic chemistry or even registered for the course.

**6. Brake Blocks:** Boats and trailers have a tendency to roll away. Placing a textbook in the wheel can prevent this.

**7. Fire Starters:** Purees of pulp and gasoline makes excellent accelerants for academic purposes. Fire tends to be an excellent way of getting out of an exam that one may not be prepared for.

**8. Cricket Bats:** Cricket can be an excellent form of entertainment. Hard covered books provide the best aerodynamics to serve as a good cricket bat.

**9. Body Armor:** Textbooks make great pads for hockey goalies and games of paint ball.

**10. Nesting Material:** Loose-leaf textbooks make great nests when mixed with bile. When rent gets too high, simply find an oak tree in a public park and begin construction at least 6 feet in the air. Nest made from textbook pages are almost like papier- mâché done by middle schoolers.

*\*Not recommended for students renting or planning on reselling books.*

## Pro-Life Club Aborts Cupcake Booth

Cupcakes undelivered and event gets aborted

By Texas Crane, Staff Writer

Earlier this week the Pro-Life Club conceived the idea to have a cupcake booth to support their club and get their message out to the students at ARCC.

"It was a shock, but the idea just happened out of nowhere and now we are going to go through with it. We are excited to add this new addition to our club's agenda," said Sarah Becker of the Pro-Life Club.

The booth was supposed to be delivered on Feb. 28, but right before the cupcakes were supposed to arrive the event was aborted.

"The club just wasn't ready for this event at this time. Once we feel our club is mature enough to take on this event we will re-schedule, but at this time it is not a plan in our near future," said Becker.

# Local Students Find a 'Good Way' to Make it Through Long Days

Highly energetic student discusses college survival.

By Savage Clemens, Staff Writer

Many students work full time jobs on campus and then they result to some unconventional ways of staying awake. Fitting in work, extracurricular activities, and classes can be a challenge for some students.

"There are three parts of a balanced breakfast: protein, fats, and an ounce of pure Columbian," said an anonymous student energetically.

The anonymous student finds the best way to work three full-time jobs, pass a full load of classes, and take the edge off is to use massive amounts of cocaine to boost energy. The student's daily routine can be described as hectic.

"I started today by running 27 miles while doing my math homework and writing a paper all at the same time," said the student.

The student appeared to be malnourished and extremely active. The student averages about 40 minutes sleep daily in order to complete their daily work load.

Money can be an especially challenging for students to come by with massive loans required to pay for classes, housing, and transportation.

Students may find themselves going to extremes to fit in the activities required to stay afloat financially.

"Sometimes it is hard to tell if a debt collector is from the cartel or looking for my student loans," stated the student.

The student finds that paying off loans can be extremely difficult while trying to obtain a degree. To many it seems the obstacles to graduate are becoming more difficult to overcome.

"It can be hard to remember why I am working for a degree, but then the truth hits me. You're basically screwed if you don't get a degree, while on the other hand, I'll be paying student loans until I'm at least 107," said the student.

With the average college student graduating with nearly \$30,000 of debt, according to The Institute for College Access and Success, this problem is becoming wide spread for American college students.

"Oh look, say hello to my little friend!" screamed the student as he proceeded to sprint off to meet a fellow student.

## Lost in Parking Lot Limbo

ARCC student find himself unable to find campus.

By Catherine Lancaster, Staff Writer

Last week, an ARCC student was reported to be found walking aimlessly alongside Highway 10, clearly distraught at his location.

"I was walking from parking lot 4, making my trek to class, when suddenly I found myself lost in the middle of the road," said an ARCC student who wishes to remain anonymous.

He said he took a wrong turn from his car, and as result ended up walking the duration of the day searching for some sight of the campus.

This is the tenth reported case of mislead ARCC students this semester, a record low compared to previous.

Students are cautioned to be aware of their surroundings, enable the GPS on their devices, and to follow the strict path guidelines outlined in the student handbook.

## Ram on the Run, Campus Mascot Reported MIA

ARCC's Golden Ram is currently rampaging after getting loose last month.

By Catherine Lancaster, Staff Writer

ARCC's mascot, the Golden Ram, is reportedly on the loose still, after getting out of his cage following last month's basketball game.

The ram is said to be close to 300 pounds and painted with the school colors. He was last spotted in the greenhouse last night, grazing on the Intro to Biology's previous lab plants.

All faculty and students are advised not to approach the mascot, if encountered, due to possible injury from its horns. If spotted, please contact the local authorities or the campus police.

# Tuition Rises, Fifty Percent

Forthcoming tuition increase to effect all students at ARCC

By Down N. Out, Staff Writer

ARCC tuition will increase by 50 percent on April 10, 2016. The reason? To fund a new football stadium to be built in the main parking lot of the Coon Rapids campus. ARCC will send out new updated bills by email sometime in April or students can access the school website to check the changes in tuition.

ARCC's new press liaison, Mr. Dick Smuckmeyer, said that Dean Lisa Harris had a dream after watching the Minnesota Vikings kicker Blair Walsh miss a 27-yard field goal in the closing seconds of the post season game on Jan. 27.

Harris dreamed that ARCC could easily have a better football team than the Vikings. The next morning she signed a contract to build a football stadium with M.A. Mortenson Company and selected Populous Company to design the stadium. These are the same companies that built and designed TCF Stadium.

When asked why build a stadium when ARCC does not have a football program, Smuckmeyer answered, "build it and they will come."

The Stink Eye went undercover and found people at the head office who don't want to be named and they said Dean Harris was trying to get the NFL Rams

to come Minnesota. The Rams went to Los Angeles instead. That is why the deal was signed so fast and now ARCC is stuck with the stadium contract.

Smuckmeyer also said that ARCC is working with Nakatomi Company to pay for half of the stadium. This has not happened yet, because if they pay half, all students will need to take two Japanese classes.

When asked where the stadium will go because of the lack of space and land at school, Smuckmeyer said, "There is plenty of space at the campus. They will use half the parking lot and use buses to bring students in. They will be able to park and ride off of Coon Rapids Blvd. and 610. The buses will pick up students every hour."

## Campus Security Report

April 1, 2016

- Campus security removes nest of gamers from Student Center. The students had reportedly been living in an enclosure constructed of fast food wrappers, Magic the Gathering booster pack packaging, and solidified human sweat. They were reported as having glazed over eyes from days of nonstop viewing of anime.
- The fire department was called after chemistry students burned down a lab after attempting to do some "cool shit" with fire.
- Paramedics arrived after a janitor was impaled by a mop sometime in the late evening. A group of maintenance workers have reportedly been participating in jousting competitions.
- A student went into diabetic ketoacidosis after drinking a large cooler of energy drink infused coffee. The student had reportedly put off a term paper until the night before the deadline. The student's blood was reported as thicker than molasses.
- Two students described as "hipsters" engaged in hand to hand combat over a reported dispute over a musical group. One student reportedly called the other's musical taste to be "a bunch of mainstream sellouts." The other proceeded to strangle the other with their scarf.

# PSEO Student Gets Four-Year Degree in Six Days

Student travels through time and space to get Engineering degree.

By JK Bowling, Staff Writer

Jason Gradfast has done it. The report has just been released. Gradfast traveled through time and has managed to obtain a four-year degree in just six days.

Gradfast said he would have done it in three if it wasn't for the spinner getting stuck on his "nifty" time travel necklace he acquired from Hermoine Granger. He said it took two days to get the tree sap off it (from a tree he ran into) and get it working again.

"Then I was able to complete my schooling in just a few more days than I originally planned," said Gradfast, a 16-year-old PSEO student from Anoka High School.

According to Gradfast, it wasn't that big of a deal. Anybody could get a degree in Nuclear Physical Engineering like he has done. He feels he owes everything to Granger who gave him the time travel necklace on his fifteenth birthday.

"Yah, she just mysteriously showed up in some black robes and handed me this little box.

In a brilliant English accent, she instructed me 'Use this wisely, mate,' then she grabbed onto what looked like a boot, spun and vanished," said Gradfast.

It wasn't until his friend Ed Stashabook, at the party, brought out a tattered copy from his car of "The Prisoner of Azkaban" that he realized what Granger had intended him to do with the necklace. The minute he connected the dots he knew he would get his schooling done by his sixteenth birthday.

"I just put on the necklace, twisted it a little and it was an amazing experience," said Gradfast.

His favorite part was getting his books at the

bookstore. Instead of waiting in the super long lines he just projected himself into the future of the semester when nobody was there and got all his books.

"It was divine," said Gradfast.

Gradfast said that studying was great too as he went back and actually talked with many great nuclear physicists.

Gradfast said it was amazing talking to Henry Becquerel back in 1896, the man who discovered radioactivity. He was able to give Gradfast some great tips for all his tests. Then he met Maria Curie after that.

"But my all time favorite was when I dropped in around 1905 on Albert Einstein who was formulating the idea of mass-energy equivalence. I even brought all my flashcards out with him and we went over all my test questions," said Gradfast.

Gradfast said he knew he could have cheated on all his tests by using the spinner necklace to go into the future.

"I am kind of old fashioned and instead I believe in doing things the honest way," said Gradfast.

Gradfast completed his degree on March 26 and though he claims to recently have misplaced his time traveling spinner necklace, he said he is moving forward with ease.

"I plan to start my own company and do something great with nuclear fusion," said Gradfast.

Gradfast said doing his schooling in six days was really exhilarating and he hopes to find the spinner necklace soon so he can get his masters degree in a half hour.

"I am determined that I indeed will be the only 17-year-old in the world who eventually obtains a doctorate in just 15 minutes or less. The future awaits," said Gradfast.

# Students Have Many Words, New Marketing Campaign

ARCC's marketing department hires BuzzFeed writers to increase enrollment.

By R.U. Entartaned, Staff Writer

ARCC announced a new campaign targeted toward increasing student enrollment and hired Dr. Klick Bates as the new marketing director on April 1.

"In my years of working for BuzzFeed, I've created several techniques for getting a reader's attention," said Bates.

Bates was hired after ARCC's enrollment numbers dropped significantly over the last two years.

"We surveyed the student population and found that students were bored with the idea of furthering their education, and so to increase awareness of the benefits of higher education, we are trying a

new campaign for increasing enrollment," said Dr. Kent Hanson, ARCC's president.

New ARCC listicles include: "You won't believe the jobs that students are getting with their Associates Degree," "Hiring Managers HATE him! See how one student can get hired anywhere" and "10 reasons why Trump HATES college students."

ARCC sent these messages to high school students in a spring mailer to get their attention.

"I can't believe our enrollment numbers after this new campaign. It's ridiculous," Dr. Bates said.

## 'New Club' Club Recruiting Members

New Club Club created to manage other clubs.

By Alex Bender, Ryan Schaal and Ashley Olson, Staff Writers

With the flood of new clubs at the ARCC Cambridge Campus, there has been some trouble getting them all up and running. In order to manage this influx, a new club has been formed and approved by the student senate to help manage other clubs. This club helps new clubs that don't have budgets to work with, to advertise and attract new membership and get a presence on campus.

Watch the campus clubs listing by the Ping-Pong table for notifications about new clubs on campus. Photo by Ryan Schaal

They're excited to have an opportunity to bolster the ranks of the current 22 clubs on campus so far and have high hopes to continue the

ongoing success of the club scene.

When asked whether the student life budget could sustain these new student organizations, a representative who wished to remain unnamed replied with, "Meh, it's not our problem."

Since its formation, the New Club Club has already received requests for support from three other clubs seeking to gain official status. They've got plans in the works for all sorts of posters, events and trips to bring in the huddled masses who don't yet know how much they need to be a part of these new organizations.

If you're interested in joining this enterprising new club, then remember to keep an eye out for info on the latest club to join our campus.

# Ping-Pong Rules Agitate Students

New rules to take effect at ARCC Cambridge campus.

By Kelly Waller, Jade Newman and Shelby Bosell, Staff Writers

"Due to excessive profanity, noise complaints, overall rowdiness, and low test scores, we are implementing new rules for the Ping-Pong table," said the coordinator for student free time, Dr. William Olson, as he posted the new rules on the wall by the table.

These new rules, which took effect on Feb. 23, came as a shock to ARCC Cambridge campus students, who are accustomed to using the Ping-Pong table without guidelines.

The first new rule limits playing time to times before and after classes, which means that the table will only be available between 7-8 a.m. and 8:40-9 p.m. In addition, games may not exceed eight minutes in length. There will be a one game per person, per day expectation.

In addition to strict time guidelines, students will now face monetary penalties for misbehavior at the Ping-Pong table. Students who lose a Ping-Pong ball will be charged \$2 and will be required to write

an apology letter to the campus's custodial team. Students who break a paddle will be expelled. All students, regardless of behavior, will be charged \$2 per game.

Only school-issued Ping-Pong balls and paddles will be allowed and students will not be allowed to provide their own. Once the Ping-Pong balls are all lost or misplaced, there will be no more Ping-Pong on campus.

Students are understandably upset about the rules.

"I lost five balls last semester. Does that mean that I retroactively owe the school \$25?" said one student, who wishes to remain anonymous.

Although students are angry about the new rules, the college hopes that the rules will help students to focus on their studies instead of on having fun. The rules went into place 10 days ago and grades on campus have already increased by two percent.

An angry Ping-Pong player notices the new rules.

School-issued paddles, such as these, are the only paddles allowed for playing at the ARCC Cambridge campus.

The new rules for the Ping-Pong table are on display.
